## TERMS OF REFERENCE

### 1. BACKGROUND

Mauritius has a rich and diverse flora, with more than 670 species of flowering plants, out of which 315 are endemic. Mauritius, already being considered as a biodiversity hotspot, represents a great opportunity for the development of Aromatherapy; Nutraceutical and Stevia sub-sectors.

### Aromatherapy

Aromatherapy is an alternative or complementary therapy for holistic healing that includes the use of aromatic substances such as essential oils extracted from plants. Over the years, there has been an increasing adoption of Aromatherapy worldwide, continuously fueling market growth. The mounting inclination towards this alternative healing approach can be attributed to the growing awareness about its benefits and to a change in people’s interest in natural care thus providing momentum to the development of natural/organic ingredients with healing abilities.

The global demand for essential oils is significant and is expected to increase considerably in the coming years. For the European market, the estimated worth of USD 1.34 billion in 2016 is forecasted to grow at a compound annual growth rate of 9.5% to reach USD 2.7 billion by 2024.

Mauritius relies heavily on importation of essential oils amounting to around Rs 200 Million on a yearly basis. In addition, from 2015 to 2019, total import of essential oils amounted to some Rs 898 Million contrasted to exportation which amounted to only Rs 39 Million.
**Nutraceuticals**

Nutraceuticals are products, which other than nutrition are also used as medicine. A nutraceutical product may be defined as a substance, which has physiological benefit or provides protection against chronic disease. Nutraceuticals may be used to improve health, delay the aging process, prevent chronic diseases, increase life expectancy, or support the structure or function of the body. Nowadays, nutraceuticals have received considerable interest due to potential nutritional, safety and therapeutic effects.

The Report on ‘Development of a Nutraceutical Framework and Industry in Mauritius’ (Economic Development Board, Oct 2020) highlights the potential for locally available nutraceuticals plant/marine organisms to unleash new economic activities and commercial ventures. In addition, some priority plants for Mauritius were identified namely: Moringa, Strawberry, Guavas, Pineapple, Papaya, Tea, Coconut, Carrot and Pumpkin.

**Stevia**

Stevia is an intensely sweet-tasting sugar substitute made from the leaves of the stevia plant. The plant is originally native to Paraguay and Brazil but is now also grown in Japan and China. It’s about 100 to 300 times sweeter than table sugar, but it has no carbohydrates, calories, or artificial ingredients. Stevia can be classified as “zero-calorie,” because the calories per serving are so low. It has shown potential health benefits as a healthful sugar alternative for people with diabetes.

As per Mauritius Chamber of Commerce and Industry (MCCI) Trade Statistics, import for artificial sweetener (including fructose, raw beet sugar and maple) for Mauritius amounted to Rs 73,364,612 in year 2019.
